NOVO-U-Guard: The NOVODAMP® Floating Floor Turn-Key Solution

The steel U-profiles are pre-equipped with the required pads tailored to the specified load requirements, allowing you to effortlessly position the entire rail onto the floor. The standard configuration includes our NOVODAMP® material with dimensions of 100 x 100 x 50 mm. Depending on your dead load and live load requirements, one of the **six available options** will be an ideal fit for your application.

Not the right solution?
Contact us! We can customize both the material and dimensions to suit your specific requirements.

About NOVODAMP®

Deflection under dynamic load (DL + 0.3*LL) **5 mm**

Frequency ~ **8 Hz**
